PROFESSIONAL SUMMARY

Product Manager with experience building and optimising e-commerce features for a D2C furniture brand serving the U.S. market, spanning pricing systems, checkout UX, payment compliance, accessibility, and internal tooling. At Sierra Living Concepts, drove an automated SKU pricing cascade across 500+ bundled products, improved ATC-to-checkout conversion through behavioural analysis and A/B experimentation, deployed a real-time quoting tool reducing response time from 1-2 days to real time, led PCI DSS compliance migration from SAQ D to SAQ A. Experienced in product experimentation, funnel optimisation, vendor management, and cross-functional execution with engineering, design, pricing, marketing, and operations teams to deliver measurable business outcomes.

PROFESSIONAL EXPERIENCE

Sierra Living Concepts

June 2025 - Present

Product Manager | (Nov 2025 - Present)

- Designed and executed 20+ product-page A/B tests, boosting add-to-cart rate by 25.71% and adding 1.67 crore INR in revenue/month through user behaviour analysis using Microsoft Clarity and BI dashboards.
- Identified that 500+ bundled furniture set SKUs had unlinked parent-child pricing mismatches of \$600–\$1,000+ USD per SKU due to manual pricing dependencies. Proposed and led development of an automated pricing system with variant-level child SKU mapping, coordinating IT, pricing, finance, and operations teams, protecting ₹35–40 lakh in monthly revenue loss, reducing per-SKU mapping time from 28 to 7 minutes through a mid-build process optimisation.
- Analysed user journeys, Microsoft Clarity recordings, and BI dashboards to identify friction points in the ATC-to-checkout flow, customers diverting to similar product recommendations and losing entered data due to an unresponsive pop-up form. Coordinated UI/UX designers and IT teams to remove distracting ATC recommendations and replace the pop-up with a dedicated checkout sub-step, reducing drop-offs from 20% to 14% and contributing to 1.2 crore INR in monthly revenue.
- Identified that custom furniture quote requests were taking 1-2 days due to manual pricing dependencies, giving customers time to disengage. Gathered requirements from the US sales team, coordinated with pricing and IT teams to define pricing logic and build a real-time pricing calculator, QA'd all outputs before deployment, improving close rates by 30% by reducing quote generation from 1–2 days to real-time during customer calls, generating ₹1.5 crore in additional monthly revenue.
- Researched PCI DSS compliance requirements across SAQ levels and produced a compliance recommendation report for senior management to reduce the organisation's compliance burden. Coordinated with the IT team to migrate the payment flow from custom card input fields to an Authorize.net hosted solution reducing the compliance scope from SAQ D to SAQ A. Subsequently drove a second iteration replacing the hosted popup with an iframe integration, delivering a smoother embedded checkout experience while maintaining SAQ A compliance.
- Coordinated development of a conditional attribute feature on PDPs that surfaces only relevant configuration options based on prior customer selections, reducing decision friction for complex SKUs. Recommended a mid-build UX improvement to display unavailable options in a greyed-out state rather than hiding them, improving configuration clarity for complex SKUs.
- Managing QA and improvement processes for an AI chatbot covering product recommendation accuracy, tone consistency, case handling, and support ticket creation across 5 structured test scenarios with multiple test cases each. Producing detailed evaluation reports with error categorisation and improvement recommendations, contributing to a significant improvement in recommendation relevance from largely irrelevant initial responses to contextually accurate product suggestions.

Management Trainee (Product Strategy) | (June 2025 - Oct 2025)

- Worked within the Product Strategy department, coordinating across sourcing, pricing, finance, operations, design, and marketing teams to execute new product launches, gaining end-to-end exposure to mapping the product development process and optimising the product lifecycle from planning to go-live.
- Conducted market research, competitor analysis, and feasibility analysis for Kids' Furniture expansion, delivering a go-to-market roadmap and U.S. laws compliance requirements document to launch in the U.S. market.
- Introduced four new products in the Daybeds category and improved category positioning and assortment presentation, contributing to 158.19% category sales growth from 12.2 lakh to 31.5 lakh INR per quarter.

BOOSTGRAD

Feb 2024 - Dec 2024

Marketing Intern (Digital Strategy & Growth Analytics)

- Conducted market, competitor, and audience research to identify growth opportunities, contributing to a 12x expansion in brand reach through data-driven targeting and content strategy improvements.
- Analysed campaign and user behaviour data via GA4, translating findings into product and positioning recommendations presented to senior stakeholders for feature prioritisation and expansion decisions.

EDUCATION

MBA, Marketing & Analytics Indian Institute of Technology Jodhpur	2023 - 2025
B. Tech, Civil Engineering Dr. APJ Abdul Kalam Technical University	2016 - 2020

KEY PROJECTS AND INITIATIVES

Automated SKU Pricing & Mapping System | Sierra Living Concepts

- **Problem:** 500+ bundled furniture set SKUs had unlinked parent-child pricing, causing manual pricing dependencies and accumulated mismatches of \$600–\$1,000+ USD per SKU, alongside operational inefficiency where every set order required manual child SKU identification.
- **Solution:** Proposed and drove end-to-end delivery of a backend automated pricing cascade system with variant-level child SKU mapping, coordinating with IT, pricing, finance, and operations teams.
- **Impact:** Dynamic price synchronisation across 500+ SKUs; SKU mapping time reduced from 28 min to 7 min through a mid-build process optimisation, automated Bundle SKUs price calculation, and child SKU identification, recovering 50 lakh INR in revenue loss per month.

Checkout Funnel Optimisation | Sierra Living Concepts

- **Problem:** Users were diverting from the ATC page to similar product pages and abandoning checkout due to an unresponsive popup-based information form that wiped data on idle.
- **Solution:** Identified friction through Clarity session recordings and BI dashboards; coordinated with UI/UX designer and IT teams to remove distracting ATC recommendations and redesign information capture into a dedicated checkout step.
- **Impact:** Reduced ATC page diversions from 20% to 14% and checkout abandonment from 84.09% to 72.77%, recovering roughly 2.89 crore INR in monthly revenue.

Real-Time Pricing Calculator for U.S. Sales | Sierra Living Concepts

- **Problem:** Custom furniture quote requests took 1–2 days due to manual pricing calculations' dependency on the pricing team, giving customers time to drop off or second-guess purchases or purchase from competitors.
- **Solution:** Gathered requirements from the U.S. sales team, coordinated with pricing and IT teams to define pricing logic and build the pricing calculator, and QA'd all outputs against manual calculations before deployment.
- **Impact:** Quote generation reduced from 1–2 days to real-time during customer calls, improving response speed and purchase decision velocity. Automated custom order price calculation, adding 1.5 crore in monthly revenue.

CORE COMPETENCIES

- **Product Management:** Product Roadmap, Product Discovery, Feature Development, PRD Development, User Stories, Go-to-market Execution, OKRs & KPIs
- **Growth & Conversion:** Funnel Optimisation (ATC → Checkout), A/B & Multivariate Testing, UX Optimisation, Conversion Rate Optimisation (CRO), Cohort Analysis, Retention Analysis
- **UX-Driven Growth:** UX handoffs informed by CRO insights, Customer Journey Mapping, Experiment Logs & Prioritisation Frameworks (ICE/RICE/PIE), Process Mapping
- **E-commerce Product Systems:** Shopify and nopCommerce optimisation, Dynamic Pricing, Product Configuration Logic, Product page CRO, Recovery Flow, PDP Optimisation
- **Agile Execution:** Scrum, Sprint Planning, Stakeholder Management, Cross-functional Collaboration, Growth Roadmapping

HARD SKILLS

- **Analytics:** Google Analytics 4, Google Tag Manager, Looker Studio, Power BI, Excel, Microsoft Clarity.
- **Advertising Platforms:** Google Ads (Search Ads, Shopping Ads, Performance Max Ads), Meta Ads.
- **CRM & Automation:** Salesforce Marketing Cloud, Zoho CRM, Mailchimp, Mandrill, N8N
- **Collaboration & Product Tools:** JIRA, Monday.com, Figma, Balsamiq Cloud, Miro, Notion
- **AI Tools:** Claude, ChatGPT, Gemini, Notebook LM,
- **Technical PM Knowledge:** API Fundamentals, System Design Concepts Basics, Database Basics, CI/CD Pipelines, AI/RAG Workflows
